In [1]:
```python
def SumOfDigits(inputNumber):
    if(inputNumber==0):
        return 0
    else:
        return(inputNumber%10+SumOfDigits(int(inputNumber/10)))
inputNumber=int(input("Enter the input number"))
print("Sum of",inputNumber,"is",SumOfDigits(inputNumber))
```

```
Enter the input number123
Sum of 123 is 6
```
